## **Natchitoches Regional Medical Center, Louisiana, USA, chooses DR 800 digital imaging multi-purpose DR system**

**The versatile DR 800 provides excellent imaging detail and dose reduction for a full range of radiography and fluoroscopy exams in one single investment**

Mortsel, Belgium – 25 May, 2021 – 16:00 CET

- The DR 800 enables lower dose, faster imaging and improved delivery of patient care.
- Dynamic MUSICA® processes both static and moving images with the same proven, high image quality and efficient workflow.
- LiveVision Technology allows accurate dose-free remote positioning.

Agfa announces that the Natchitoches Regional Medical Center (“NRMC”), which operates 17 health-related clinics and facilities in Louisiana, USA, has implemented the DR 800 multi-purpose digital imaging room at its 96-bed flagship hospital.

With the Dynamic MUSICA® image quality, dose reduction potential and innovative remote positioning technology, the DR 800 will contribute to this growing network’s mission to offer a broad continuum of innovative care.

### **High-quality hardware, image detail and service**

“Agfa’s main focus is on general radiography, and it shows: I have worked with every system in the market, and am delighted with the overall hardware quality, exceptional image detail, dose reduction, functionality and user-friendliness offered by Agfa,” says Derek Anthony, Radiology Manager for NRMC.

“In conversations with radiologists and clinicians, they told me that the MUSICA® Dynamic and 3+ software provides exquisite digital images. Finally, the teams from Agfa and its dealer, Performance Medical Group, have proven to be highly professional. All this made the DR 800 the clear choice for me,” he continues.

“We are very pleased that NRMCC has chosen the DR 800, which offers a unique design that supports enhanced patient care by providing detailed images with more information and better visualization. By listening closely to the input of radiologists and technologists, we strive to deliver a usability that is second to none, while meeting the constantly increasing requirements for dose reduction and productivity,” says Jared K. Houk of Agfa, Senior Vice President, Radiology Solutions of North America.

### **A flexible solution for fluoroscopy and general radiography**

The versatile DR 800 can handle a full range of radiography and fluoroscopy exams with a single investment and there is no need for additional specialty rooms. The care provider can choose to work in the room tableside with the patient, or use the remote functionality and LiveVision Technology which allows for accurate dose-free remote positioning for radiologists and technologists.

### **Imaging excellence, powered by MUSICA®**

The DR 800 comes with the MUSICA® imaging workstation, which enhances workflow and productivity, with a single, intuitive interface for smooth, efficient DR imaging.

Agfa’s latest generation of its gold-standard MUSICA® image processing software provides “first time right” imaging, delivering exquisite details throughout the image and offers the potential to lower patient dose. MUSICA® can handle fluoroscopic images with the same high quality and low-dose features that have made it the “gold standard” for radiology departments around the world.

### **About Agfa**

Agfa develops, produces and distributes an extensive range of imaging systems and workflow solutions for the printing industry, the healthcare sector, as well as for specific hi-tech industries such as printed electronics & renewable energy solutions.

The headquarters are located in Belgium. The largest production and research centers are located in Belgium, the United States, Canada, Germany, France, the United Kingdom, Austria, China and Brazil. Agfa is commercially active worldwide through wholly owned sales organizations in more than 40 countries.

### **About Performance Medical Group**

Performance Medical Group is one of Agfa Radiology Solutions’ top producing strategic channel partners in the USA. For over 50 years, Performance Medical Group has been dedicated to providing superior quality

imaging solutions and services to healthcare professionals from hospitals, medical centers, orthopedics, urgent care and private practices throughout the U.S.A. Gulf Coast area.
